Premium alkylate and specialty fuels. Engineered for professionals. Powered by fuel experts.

Building on more than 160 years of industrial heritage and decades of fuel expertise, Haltermann Carless combines deep knowledge of fuel formulation with a thorough understanding of applications. We develop premium alkylate and specialty fuels that perform where reliability, safety and durability matter most.

Professionals in forestry, landscaping, construction and grounds maintenance need fuels that combine dependable performance, cleaner operation and reduced downtime with a more sustainable approach – while protecting equipment and users in demanding environments.

Haltermann Carless fuels are designed to meet exactly these expectations:

- Cleaner combustion
- Reliable starting performance
- Excellent storage stability
- Extended engine durability
- Reduced emissions and health exposure

Beyond fuel: turning fuel into a competitive advantage

For our customers, premium fuels can create new opportunities and generate additional value throughout the product lifecycle. As a fuel pioneer and trusted partner, Haltermann Carless supports you with custom fuel development, sustainable fuel pathways and a comprehensive range of services from concept to delivery:
